DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3,8,10-13,18,20-23,28,30-33,38, and 40 are rejected under 35 U.S.C. 102(e) as being anticipated by Hamada (USPN 6,436,101). With respect to Claims 1,10,11,20,21,30,31, and 40 Hamada discloses “an instrument for distracting a disc space between adjacent vertebrae and simultaneously preparing endplates of the vertebrae 451”. “Instrument 451” having “a body 455 having an upper surface 457” and lower surface 471”. Furthermore, “instrument 451” comprises “a first plurality of teeth 507 extending across the upper surface 457” and “a second plurality of teeth 521 extending across the lower surface 471” as best seen in FIG. 44. As to Claims 2,8,12,18,22,28,32, and 38, FIG. 37 shows the upper and lower surfaces 457,471 taper posteriorly such that the body has a thickness that decreases from the “anterior end 477” to the

Art Unit: 3732

“posterior end 475”. With regards the Claims 3,13,23, and 33 as best shown in FIG. 35, “the instrument 451”, further comprises “an inserter 105” removably coupled to “the body 455”.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9,19,29, and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hamada. Hamada discloses the claimed invention except for the upper and lower surfaces of the instrument taper from the anterior end to the posterior end at an angle of about 7 degrees. It would have been obvious to one having ordinary skill in the art at the time of the invention to design the instrument such that it decreased at an angle of about 7 degrees from the anterior end to the posterior end, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Allowable Subject Matter

Claims 4-7,14-17,24-27, and 34-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
